  - Molded of chemical-resistant, impact-resistant plastic
  - Splashless Front - all corners radius molded and finished smooth - no seams, no cracks, no edges, no leaks
  - Utilizes Flow-through Pad System for quick and easy cleaning
- No Assembly Required -**

No one likes to clean dirty Silk Screens. Cleaning screens is the nastiest...absolutely the worst job in the whole shop!

**Screen Klean Systems** takes the drudgery out of cleaning screens. Our system works quickly, safely and economically.

*No one makes money cleaning screens - You make your money Printing... Not cleaning screens!*

**Solvent Recycling and Filtration** is the highlight of our system. Good cleaning solvents are expensive. It doesn't make sense to use them once, only to then wash them down the drain.

**OUR SYSTEM RECYCLES YOUR SOLVENTS!**

We use the same solvent over and over - nothing is EVER poured down the drain.

By using Multi-Level Filtration, solvents are cleaned through a series of filters to a final 1 Micron filter, ensuring a long solvent life.

No endless waste disposal fees - in fact, you can probably own our system for less than you are paying for a service contract.

*We Don't Waste Solvents...We Save You Money!!!*
